Geometry (G.CO.12) Unit One C – Constructions #2 (HW2)

Name:	
Date:	Period:

1. Bisect the segments.
EF
2. Construct a line parallel to the given line through point A.
A •
\leftarrow
3. Construct an isosceles triangle. (Hint: Start by drawing your two segments to use as a base and legs.)
5. Construct an isosceles thangle. (mint. start by drawing your two segments to use as a base and legs.)
4. Construct perpendiculars to the given lines through A.
A
\neg
Α •

5. Bisect the given angle.
6. State the method you are going to use to solve the system. Then solve the system showing the appropriate work.
$\begin{cases} y = 2x + 2\\ 4x - y = -6 \end{cases}$
4x - y = -6
Method: Solution:
7. State the method you are going to use to solve the system. Then solve the system showing the appropriate work.
$\begin{cases} 3x + 6y = 12 \\ -x + 3y = 6 \end{cases}$
(-x+3y=6)
Method: Solution:
8. Given $\angle ABC$ is bisected, find $m \angle ABD$ using the information provided.
1
2x + 7
$B \xrightarrow{3x-10} C$
