## Geometry (G.CO.2-5)

Unit One A: Assessment Review (HW15)
Your work:

Name: $\qquad$
Date: $\qquad$ Period: $\qquad$

## Corrected work:

1. Draw the image according to the rule given and identify the type of transformation as completely as possible.

$(x, y) \rightarrow(-x,-y)$
2. Draw the image according to the rule given and identify the type of transformation as completely as possible.

$$
(x, y) \rightarrow(-y,-x)
$$

3. Translate the preimage below using the given translation vector.

4. Name the type of transformation occurring in each preimage/image pairing.
a.

b.

c.

d.

5. a) Move all points up 3 and left $5 \quad(x, y) \rightarrow$ ( $\square$
$\square$
b) Reflect all points across the $x$-axis $(x, y) \rightarrow$ ( $\qquad$ ,
c) Rotate all points $180^{\circ}$ clockwise $\quad(x, y) \rightarrow($ $\qquad$ , _
6. $\mathrm{R}_{\mathrm{o}, 27 \mathrm{Occw}}(\triangle \mathrm{ABC})$

7. Draw a dilation of the given preimage using a scale factor of 2 and the given center of dilation.

- 

8. The diagram below shows a figure that has been transformed in some way. Describe this transformation as completely as possible.

.

| 9. Reflect the given figure over the provided line of reflection. |  |
| :---: | :---: |
| 10. a. Name the intersection of $A B M$ and $\overrightarrow{O A}$. $\qquad$ <br> b. Name a segment on ABM. $\qquad$ <br> c. Name the line 2 different ways. $\qquad$ <br> d. Are A, C, and D collinear? $\qquad$ <br> e. Are A, O, C, and D coplanar? $\qquad$ <br> f. Name the $\perp$ objects. $\qquad$ <br> g. Name the right angle. $\qquad$ <br> h. Name the intersection of ACD and $\overline{O B}$. $\qquad$ |  |
| 11. Identify the type of transformation (translation, reflection, rotation, or dilation) in each of the images below. <br> a) TRANSFORM <br> b) <br> c) TRANSFORM TRANSFORM |  |
