Geometry (HSS-CP.A.1) Unit Six: Probability – Review (HW7)

Name:	
Date:	Period:

1. Why does the relationship P(A) + P(B) = P(A or B) work only for mutually exclusive events?

2. Timothy is asked to determine the P(iPod or iPhone). He adds the column P(iPad) = 30/72 to the row P(iPhone) = 55/72 and gets 85/72. Because this number exceeds 1 he knows that he has done something wrong. What did he do wrong? What should the correct answer be?

	iPad	Not iPad	Total
iPhone	25	30	55
Not iPhone	5	12	17
Total	30	42	72

3. Draw and completely label a Venn Diagram for each scenario. Determine the probability requested.

a) P(A) = 0.45 P(B) = 0.56	b) P(A <b>or</b> B) = 0.8	
P(A and B) = 0.2	P(A) = 0.6	P(B) = 0.5
P(A or B) =	P(A and B) = U	

lu

4. Given that events A and B are independent, determine the probabilities. Draw and label a Venn diagram.

P(A) = 0.3 P(B) = 0.7

P(A and B) = \_\_\_\_\_

P(A or B) = \_\_\_\_\_

e) P(Black) = \_\_\_\_\_

5. Use the two way frequency table to determine the probabilities.

Red **Green Blue Yellow Total** a) P(Red or Green) = \_\_\_\_\_ b) P(Yellow) = \_\_\_\_\_ Male 15 9 11 2 37 Female 8 12 6 7 33 c) P(Male or Green) = \_\_\_\_\_ d) P(Male) = \_\_\_\_\_ 9 23 21 17 70 Total

6. A 12 sided dice is rolled. Complete the sample spaces using set notation. Shade the required region in each Venn diagram and determine the requested probability.

Set A = Factors of 6 = P(A) =		Set B = #'s greater tha P(B) =	n 9 =
Set C = Odd Numbers = P(C) =		Set D = {4, 8} P(D) =	
<b>a)</b> <u>Shade</u> P(A or B)	$\begin{array}{c} U \\ \hline \\ 3 \\ 2 \\ 6 \end{array} \\ \begin{array}{c} \text{Set } A \\ 4 \\ 4 \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ 4 \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ 4 \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ 4 \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ 4 \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array} $ \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array}  \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array}  \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array}  \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array}  \\ \\ \end{array}  \\ \begin{array}{c} \text{Set } D \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array} \\ \end{array}  \\ \\ \end{array} \\ \end{array} \\ \end{array}  \\ \\ \end{array} \\ \end{array}	<b>b)</b> <u>Shade</u> P(C and D)	$\bigcup_{\substack{\text{Set A}\\2,6}} \bigcup_{\substack{\text{Set D}\\4,e}} \bigcup_{\substack{\text{Set D}\\4,e}} \bigcup_{\substack{\text{Set D}\\4,e}} \bigcup_{\substack{\text{Set D}\\4,e}} \bigcup_{\substack{\text{Set B}\\4,e}} \bigcup_{\substack$
P(A <b>or</b> B) =	1 3 Set B 5 7 9 11 12 10 Set C	P(C <b>and</b> D) =	1 3 Set B 5 7 9 11 12 10 Set C

7. Given a jar of cookies with 5 chocolate chip, 3 oatmeal, and 2 peanut butter cookies in it, determine the following probabilities.

a) Getting an oatmeal cookie and<br/>then a chocolate chip cookieb) Getting two chocolate chip<br/>cookies without replacement.c) Getting a peanut butter cookie<br/>or an oatmeal cookie.without replacement.

P(O and CC) = \_\_\_\_\_ P(CC and CC) = \_\_\_\_\_ P(PB or O) = \_\_\_\_\_

8. Given two bags of marbles, bag #1 with 2 green, 3 red and 7 orange, and bag #2 with 5 green, 1 red and 4 orange. Determine the following probabilities.

a) Getting an orange from bag #1 and	<ul><li>b) Getting a red from bag #1 and</li></ul>	c) Getting a green from bag #1 and
then getting a green from bag #2.	then getting a red from bag #1	then getting a green from bag #2.
	without replacement.	

P(O1 and G2) = P(R	R1 and R1) =	P(G1 and G2) =
--------------------	--------------	----------------

9. Using the marble bags in question #8, what would P(Green and Green) be if the person picked from bag #1 and then placed that marble into bag #2 and then picked from bag #2?

## 10. Given a standard deck of cards. Determine the probabilities.

a) Getting a red card and then a red card <b>without</b> replacement.	b) Getting a face card and then a 5 <b>without</b> replacement.
P(Red and Red) =	P(Face and 5) =
c) Getting a 2 and then a 2 <b>without</b> replacement.	d) Getting two black face cards <b>without</b> replacement.
P(2 and 2) =	P(B Face and B Face) =
e) Getting a red card or a black king.	f) Getting a face card or a diamond.

P(red or black king) = \_\_\_\_\_

P(face card or diamond) = \_\_\_\_\_

## 11. Complete the tree diagram by writing in the probabilities for each branch and then calculating the probabilities for each possible outcome.

Bag #1 has 2 white and 3 red marbles and bag #2 has 4 purple, 2 green and 1 orange. Pick from bag #1 keep it and then pick from bag #2.
